TELL US ABOUT M.D. MOLLER CO AND ENLIGHTEN.

Mike and Shannon Moller started M.D. Moller Co. in 1999 in Michigan before a shared passion for mountain recreation had them relocate their young family and business to the Vail Valley in 2001. Once here, M.D. Moller quickly became a preferred electrical contractor for local builders, interior designers, and art lighting designers alike.

Their portfolio includes high-end, luxury, private residences throughout the valley, with special features as seen in *Luxe Interior + Design* magazine. Years of working closely with local professionals and lighting visionaries planted an early spark to build a business that brought together professional electricians and integration system specialists, utilizing the industry's most innovative whole-house lighting and shade solutions. "It's always been about more than just turning on the lights. It's creating an atmosphere... a feeling," says Mike.

Inspiration met opportunity in late 2022 when Enlighten was launched. "When we met with Matt (McKenzie) about this collaboration, we knew it was the perfect fit," says Mike. Matt has been working in the world of control integration and design for over 25 years. Together, with their combined 55-plus years of experience, Mike and Matt offer an extensive portfolio of experience and vision.

WHO ARE YOUR CLIENTS?

Our clients include general contractors and builders, interior designers, lighting designers, property managers, and private homeowners.

WHAT SERVICES DO YOU OFFER?

High-end custom residential electrical
Whole-house lighting
Lighting design
